TECHNICAL SKILLS

Languages: TypeScript, Python, C Sharp, SQL, C++
Frontend: Next.js, React.js, Redux Toolkit, Tailwind CSS
Backend: Node.js, Express.js, ASP.NET, Prisma ORM, n8n
Databases: PostgreSQL, MSSQL, DynamoDB
Cloud and Deployment: AWS, VPS, Nginx, PM2, Git

EXPERIENCE

Full Stack Developer

Dec 2025 – Present

HireZapp

Remote

- Built and enhanced core modules of an AI-powered recruitment platform across talent sourcing, candidate communication, pre-offer workflows, application search, candidate data pipelines, and recruiter dashboards.
- Developed sourcing workflows across 10+ recruitment channels including LinkedIn, WhatsApp, job boards, colleges/TNPs, edtech partners, coaching institutes, and employee referrals, implementing filtering, campaign tracking, recipient status tracking, and source attribution.
- Developed event-driven recruitment outreach workflows using AWS Lambda, SQS, SES, DynamoDB, and Gmail/Zoho integrations, enabling AI-generated outreach, reply classification, automated follow-ups, recipient tracking, and campaign lifecycle management.
- Optimized application search and retrieval for 50k+ applicant records using Typesense-backed indexed search, cursor pagination, tenant/workspace-scoped filtering, and bulk indexing pipelines.
- Built a canonical candidate data pipeline from scratch using n8n, DynamoDB, LLM-based profile normalization, identity resolution, and PostgreSQL upserts, unifying 7k+ application and passive lead records with deduplication, skill normalization, and location standardization logic.
- Built DOCX-based pre-offer and offer-letter workflows from scratch, including template management, placeholder processing, PDF generation, S3 storage integration, and recruiter/candidate offer management flows.

Full Stack Developer

Feb 2024 – Nov 2025

Freelance

Remote

- Delivered 5 production-ready business applications across e-commerce, restaurant operations, and financial management domains using Next.js, React, Node.js, ASP.NET, and PostgreSQL/MSSQL.
- Designed secure backend architectures with role-based access control, JWT authentication, Prisma ORM, and scalable API integrations supporting real-time business operations.
- Managed cloud and on-premise deployments using AWS, VPS infrastructure, Nginx, PM2, and Docker, enabling reliable multi-environment application delivery.

PROJECTS

DineManager | Restaurant Operations & Kitchen Workflow Platform

Mar 2025 – Apr 2025

- Built a restaurant operations platform supporting order management, role-based access control, and real-time workflow coordination for staff and management.
- Developed a real-time Kitchen Display System (KDS) with automatic order status synchronization between service and kitchen teams, reducing order processing delays by 25%.
- Designed scalable REST APIs using Node.js, Express, Prisma ORM, and MSSQL while optimizing data access patterns for high-volume order processing.
- Architected dual deployment models supporting both on-premise (Nginx, PM2) and VPS-hosted environments, delivering 99% uptime.

DigitalDepot | E-Commerce Operations Platform

Jun 2025 – Jul 2025

- Engineered an end-to-end e-commerce platform using Next.js, React, TypeScript, PostgreSQL, and Prisma ORM, supporting product discovery, authentication, shopping cart management, and order lifecycle workflows.
- Implemented GST-aware checkout, dynamic pricing calculations, and Redux-based state management to streamline purchasing workflows.
- Integrated Razorpay payment processing with webhook verification, transaction validation, and order tracking workflows, deploying the platform on VPS for production use.

- Developed a multi-user fund collection and reporting platform using ASP.NET, C Sharp, and MSSQL, supporting district-level administration and role-based access control.
- Built reporting and dashboard workflows with optimized SQL queries, achieving sub-second performance across datasets exceeding 10,000 records.
- Deployed the platform on VPS infrastructure, enabling centralized visibility and reporting across multiple districts.

EDUCATION

Indian Institute of Information Technology, Kottayam

BTech in Computer Science and Engineering — CGPA: 7.2/10

Kottayam, Kerala

2023 – Present
